Kovalevskaya Grants
Call for applications by mathematicians from the Czech Republic

Overview

The [Kovalevskaya grants](#) support the participation of early career mathematicians at the [International Congress of Mathematicians 2022](#) (July 6-14, 2022, Saint Petersburg). They cover the local expenses at the congress (including accommodation and meals). The grant recipients' registration fee for ICM 2022 will be waived and visa-free entry to Russian Federation will be arranged.

The Czech Committee for Mathematics is the local partner of the organisers of ICM 2022, responsible for the selection of recipients of the Kovalevskaya Grants from the Czech Republic.

The grant does not cover travel costs. In the case of Czech participants, it is expected that these will be covered by the home institution of the recipient.

Who is eligible

- **doctoral students** at universities in the Czech Republic
- mathematicians who obtained their Ph.D. degree **not earlier than 6 years before the start of ICM 2022** (with an extension possible in case of long-term illness or parental leave), working at an institution in the Czech Republic

How to apply

1. [Register](#) for ICM 2022.
2. Send the application and the requested documents (see below) to Prof. Tomáš Kaiser (kaisert@kma.zcu.cz), the secretary of the Czech Committee for Mathematics.

The deadline for applications is **September 30, 2021**.

Requested documents

- signed application on the standard **application form**
- CV
- list of publications
- letter of recommendation (signed, on letterhead)

Further information

Further details and the application form can be found at https://www.ckm.zcu.cz/2021/KG .
